

# Karan Sangoi

## SUBTITLE

Kind, Logical, Funny!

## THING I AM PROUD OF

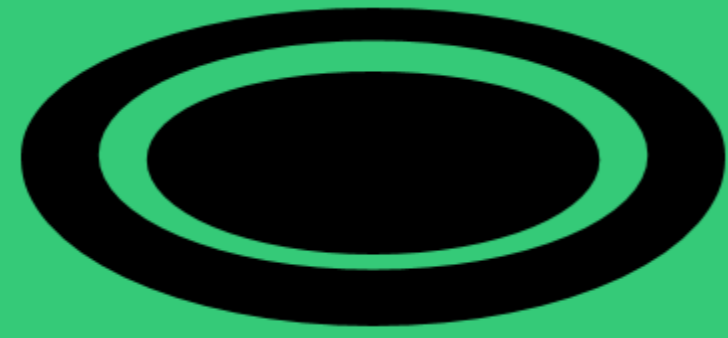

I am proud of my kind and logical nature 😊 And for the tangible thing, its about the app I created for my graduation final and secured highest marks ever in that college.

## HOBBIES

My greatest hobbies are playing or watching sports/games.

Life is incomplete without sports :D

**DISH**   
Sandwich!

 **DESTINATION**

Everywhere, where its calm and  
not hustling.

# FAVORITES

**MOVIE/SHOW** 

For the movies I like one based on real life characters/story or classic Bollywood comedy (Hera Pheri, Bhagam Bhag, Dhamaal, Chupke Chupke, All the best, etc).

For the shows, I like real street-smart story like Suites, House of Cards.

 **MUSIC TYPES**

I like music rather than song; any music makes me tap my hands and move my legs

# LIFE DIMENSIONS

# LEARNING STYLE

## ASSIMILATOR

As my nature, my learning style is same I tend to focus on logical soundness of theories and focus on ideas & concepts rather than people.

## STRENGTH #1

Having a creative brain, and putting a logical soundness on top of it makes me able to develop theories and define problems 😊

## STRENGTH #2

Because I am less focused on people and more interested in idea, I make a good plan for almost many things!

## OPPORTUNITY

The best application of my learning style is the department I work in - Tech. I can improve on my logical thinking and plan better things for tech platform for Twimbit.

My buddy with opposite learning style is Sumit (Accomodater). And we have plan to understand the opposite view every time we plan/brainstorm/take decision for the tech platform and other life views.
