E-Sim purchasing process, iteration, and scoresheet

- Went through end-to-end journey of e-sim purchasing through the brand's website using a smartphone
- Screenshot every step, action, and page visited.
- Iterate and modify the evaluation criteria and scoring.
- Document the steps taken and actions into the scoresheet.
- Calculate evaluation criteria in score using a range of 1-5.

Analysis, report, recommendations, and presentation

- Weighted scores were given to identify the best e-sim purchasing experience.
- Identify friction points to improve upon.
- Create independent recommendations for telcos

|Yodo and Holafly provide a variety of round-the-clock customer assistance

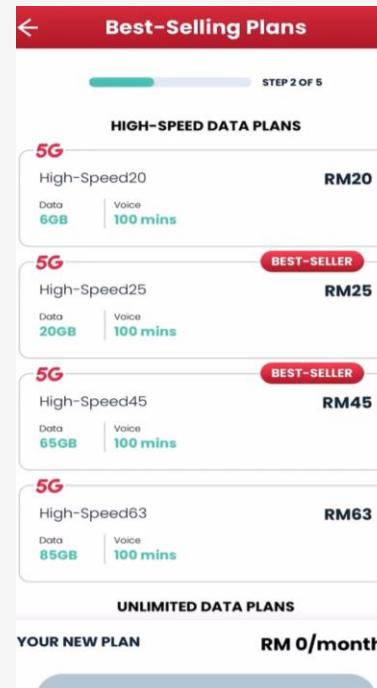

Holafly and Yodo have 24/7 live chatbots and Whatsapp services for instant support, ensuring users have instant access to help whenever they need it

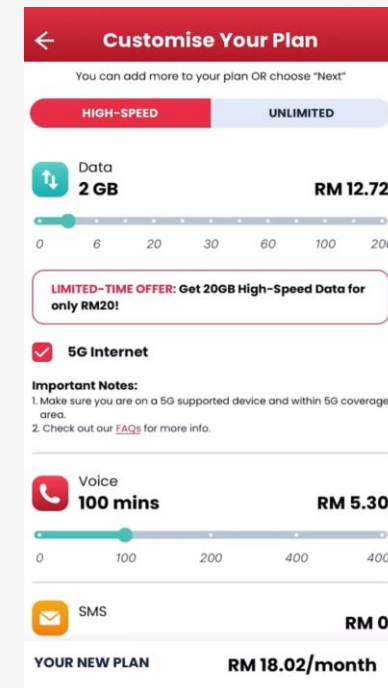

|Yodo simplifies plan selection with a guided process, empowering customers to find their perfect fit

Steps for purchasing the e-sim are laid out clearly

Best-selling and recommended plans are easily viewed, with additions/top-ups

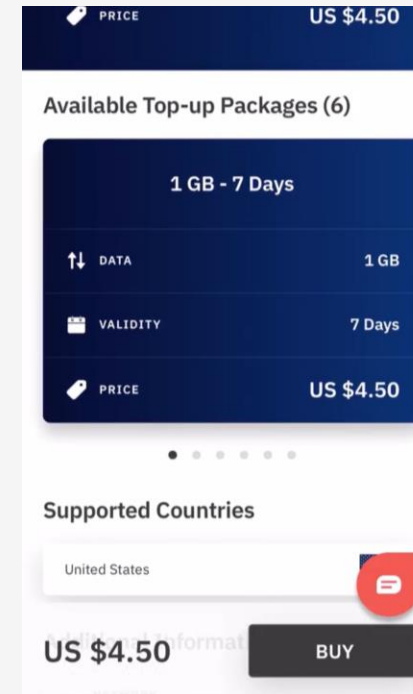

Offers flexible add-on plans for individual needs

| Airalo prioritises a simple website, making it user-friendly for first-time customers

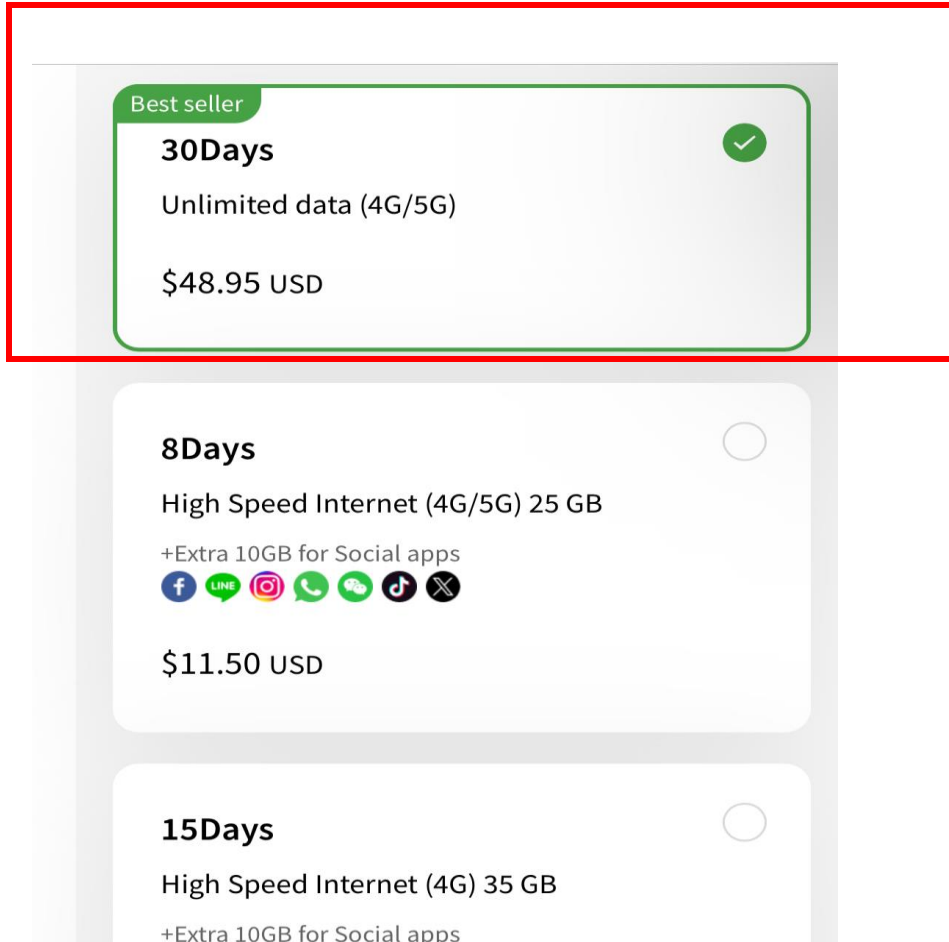

Packages for different countries available are easily accessed from the first page

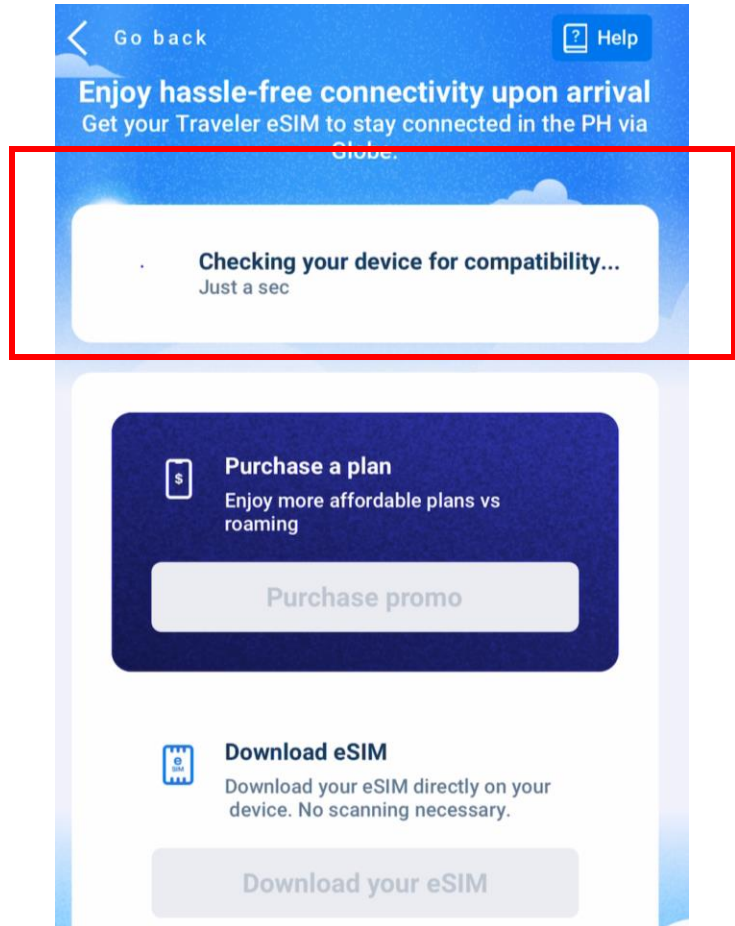

Package details are clear and easy to read with clear CTA icons to guide users

|AIS highlights its best-sellers to help customers make better decisions

AIS labels its best seller and guides users to consider it as their package option, helping them make a more informed decision

Automatic device compatibility detection on Globe's app simplifies setup process

Skips manual compatibility checks
by automatically detecting the
device upon app activation for a
seamless process

Additional insight

Website performance

Through Google's PageSpeed Insights, we analysed how quickly e-SIM purchases load on telco websites. This score (0-100) reflects user experience, with higher scores indicating faster loading times and a smoother purchase journey.

Desktop Speed

Additional Insight

e-KYC Process

Telcos with mandatory e-KYC

KYC (Know Your Customer) protocols verify customer identities to comply with safety regulations in various countries.

e-KYC required

Screenshots of AIS' eKYC process

Selfie, IC/passport scanning required as part of the verification process

eKYC required (Location-specific)

Verification can only be done when connected to Changi airport Wi-Fi

Verification can only be done when connected to Globe network in Philippines

Third-party solutions bypassing e-KYC

No KYC required

Our analysis found providers like Holafly (Spain), Airalo (Singapore), and Yesim (Netherlands) didn't require identity verification during a purchase attempt in Singapore.

Notably, these providers offer **data-only plans** and don't provide a mobile number.

However, eSIM regulations vary by region.

- 1. e-KYC requirements:** In specific countries, telcos are mandated to implement e-KYC processes to prevent fraud, enhance security, and ensure compliance with anti-money laundering (AML) and counter-terrorism financing (CTF) laws.
- 2. Stricter regulations in India:** In addition to e-KYC, offering eSIM services in India requires a No Objection Certificate (NoC) from the Department of Telecommunications (DoT) and sales can only happen through authorized dealers. This highlights a stricter regulatory environment compared to other regions. Notably, Airalo and Holafly have been banned in India for failing to comply with these regulations.

4th Journey

Payment Methods

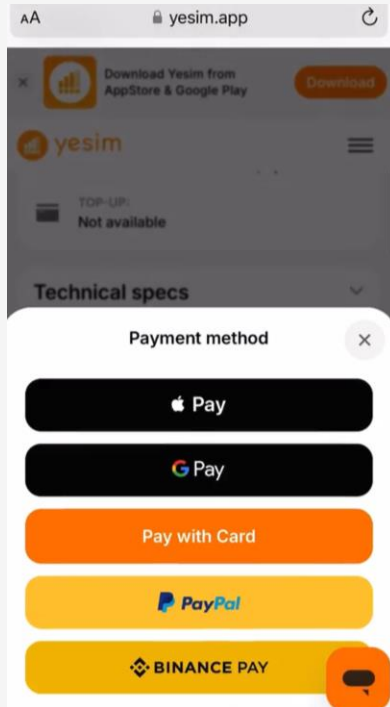

Payment Methods

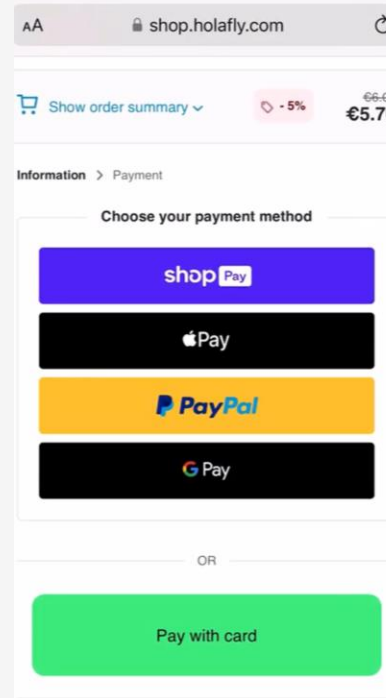

Payment journey	Starhub	Singtel	Yodo	AIS	Globe	Airalo	Holafly	Ye-sim
Overall score	1.75	1.75	2.35	2.20	1.75	2.65	3.53	3.91

Evaluating criteria	Starhub	Singtel	Yodo	AIS	Globe	Airalo	Holafly	Ye-sim
Variety of primary payment methods <i>(e-wallet, online banking, debit/credit card, others)</i>	Debit and credit card	Debit and credit card	Debit and credit card	E-Wallet and credit card	Debit and credit card	Debit and credit card, and E-wallet	Debit and credit card, E-wallet and Online banking

|Globe's automatic and effortless e-sim activation without QR codes

Globe automatically downloads the eSIM profile, eliminating the need for QR codes

Key takeaways:

Analyst's Recommendations

1

Effortless Onboarding

a

Simplified discovery

- Include keywords like target market/benefits/brand name in titles.
- Use actionable CTAs for easy Google search.
- Avoid chaotic links and unclear language.

b

Informative first page

- Provide a comprehensive dashboard displaying all plans, bundles, e-sim info (features, perks) clearly to encourage an informed decision.
- Offer new user promotions, pop-up banners, and ads to showcase plan benefits and drive adoption.
- Auto-suggest plans based on location & cost-efficiency.

2

Intuitive purchasing experience

a

Personalised plan comparison

- Avoid long lists of information, instead allow customers to customise which plans they want to compare.

b

Frictionless purchase

- Clearly show total purchase steps with a navigation guide.
- Ensure the purchase process with less than 5 steps.
- Highlight best-seller plans for easier choice.
- Enable in-page device compatibility check. Auto-detect compatibility if possible.
- Avoid cluttered plan information.

c

Flexible checkout

- Allow plan changes and add-ons during checkout.
- Provide multiple convenient international payment methods.

3

Self-service management and support

a

Convenient delivery

- Provide instant payment confirmation
- Consolidate emails with order details and clear activation instructions via QR code

b

Seamless activation

- Present activation steps with easy-to-understand visuals.
- Provide separate and clear activation instructions for iPhone and Android devices.

d

Multi-channel accessibility

- Ensure customer service accessibility across various channel: email, hotline, social, live chat and conversational AI with natural language understanding.

c

Effortless identity verification

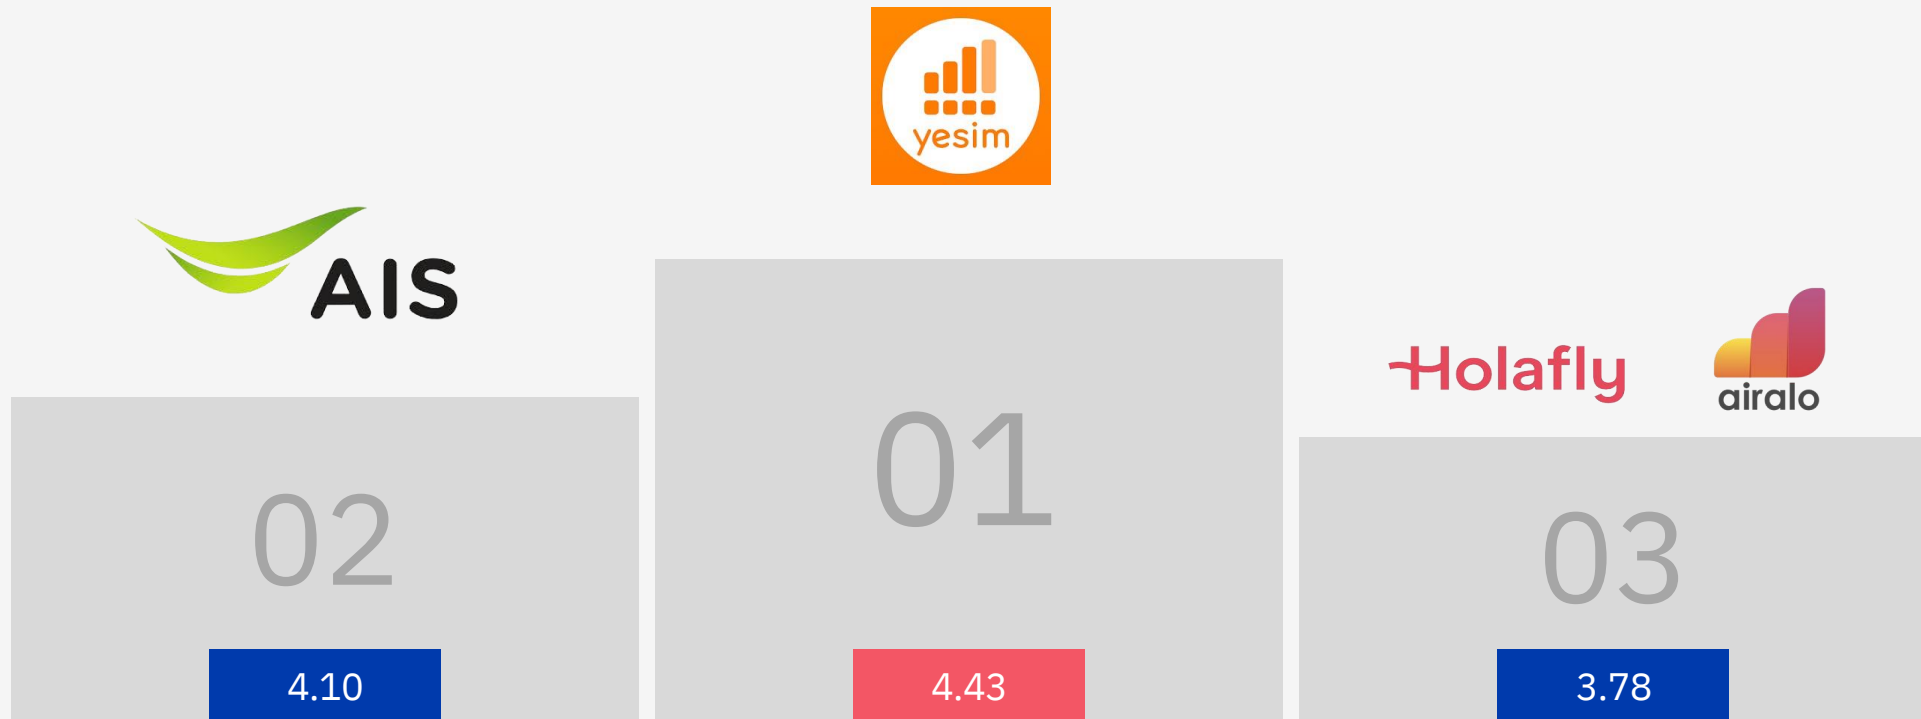

- Enable personal verification (under 1 minute) using phone number or email via a secure OTP.
- Enable passport/ID verification within the hour with email notification.
